TX760|860 INBOARD

TOURMAX SERIES

TX-760/860 deep V shaped hulls from bow to stern with pronounced strakes along the full length of the hull makes it possible to cut through the waves even in harsh sea conditions, increases their lift and hold power when manoeuvring, maximising the power and speed ratios. Internal support structure with military-grade specifications and practically unsinkable buoyancy reserves. These models are used for rapid intervention operations, offshore rescue, extreme charter auxiliaries and other activities that demand high specifications, speed and double motorization.

- 100% configurable boats.
- Specific designs for different activities (Rescue, Club, Diving, Patrol, Charter, etc.),
- Ask us about the possibility of deciding the configuration of the boat since the design phase. info@vanguardmarine.com
