

Reliable & Durable European RIB

VANGUARD
NAUTICA SERIES

Global Presence, Operating in Over 50 Countries

EVOLUTION

For over 40 years, the Vanguard Marine technical team has been developing successful international projects, such as Valiant® boats (1995-2012), along with significant technological improvements, including **Akron TPE®** tube fabric with the highest abrasion resistance; **Thermosealing®** technology for welding tubes without adhesive bonding, and **VITECH® (Vacuum Injection Technology)** for hull composite manufacturing by vacuum infusion. Recently, we have also developed the globally patented **Rinterlock RTS® (Removable Tube System)**, enabling the hull-tube assembly without adhesives or screws.

CUSTOM

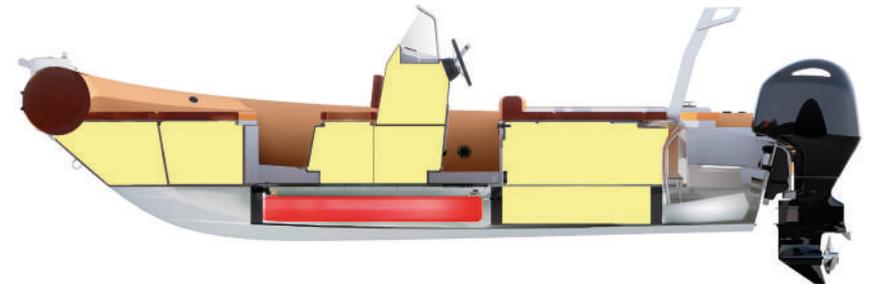

DESIGN AND MANUFACTURING

DESIGN - Elegant, Robust and Powerful

With great experience, technological leadership, and a highly qualified team of engineers and designers, Vanguard Marine applies the most advanced design and manufacturing techniques to develop units that meet the highest standards of durability, performance, and endurance— in both for professional and recreational sectors.

Each boat is custom-designed based on the client's specifications and needs, ensuring a fully equipped and ready-to-go product, from initial design to final turn-key delivery.

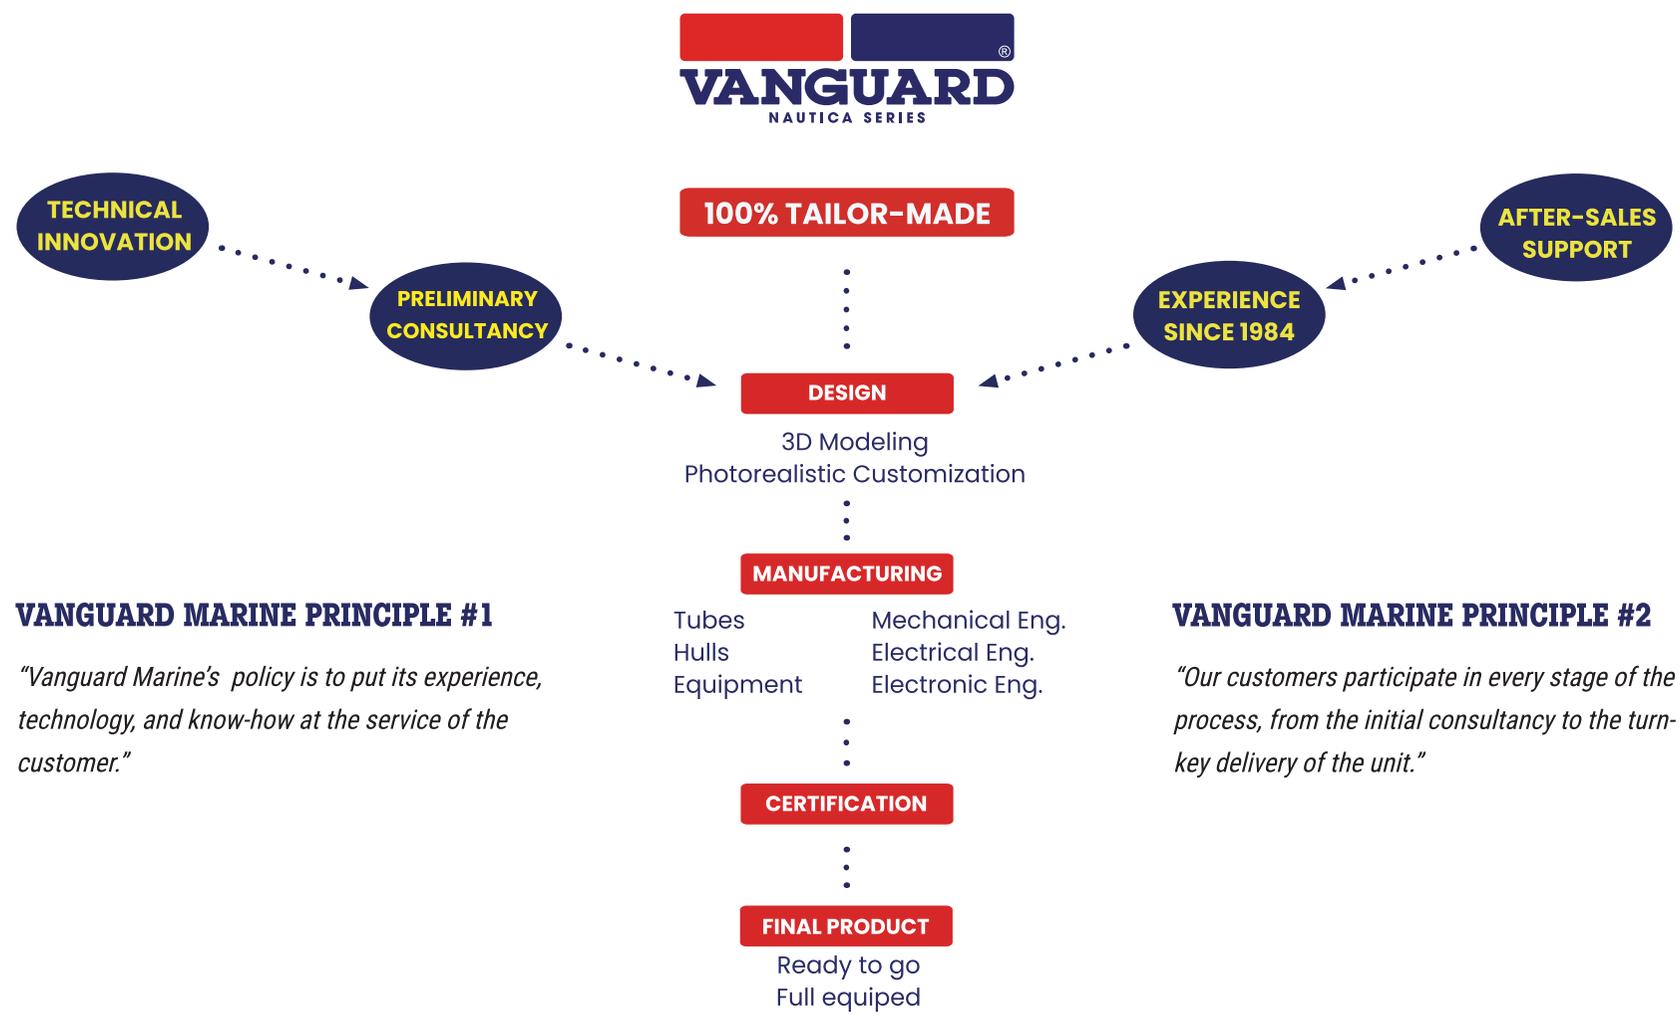

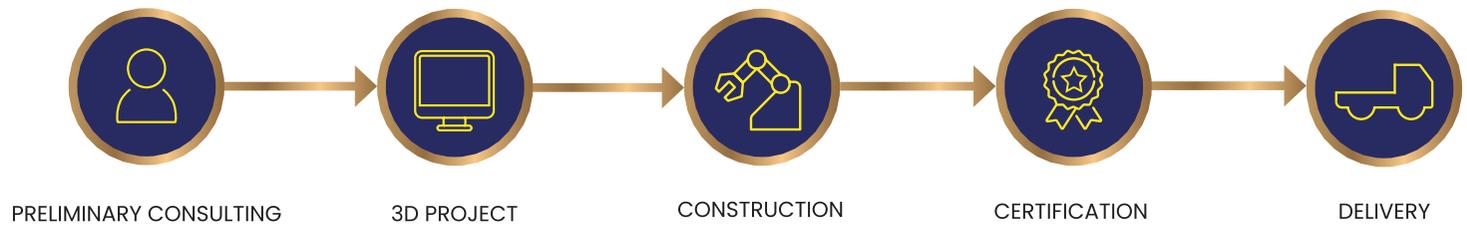

MANUFACTURING - Balance of advanced technology and handcrafted care

Since its creation, Vanguard Marine has been one of the few boat builders that manufacture all vessel components in-house, including tubes, hulls, and equipment. Additionally, we manage the engineering assembly, covering propulsion, electrical, mechanical, and electronic systems.

Every operation undergoes rigorous installation tests, followed by sea trials, ensuring maximum reliability. This commitment guarantees absolute control over the design, construction, and performance of the boats, ensuring each unit fully complies with customer specifications, as well as all safety and certification requirements.

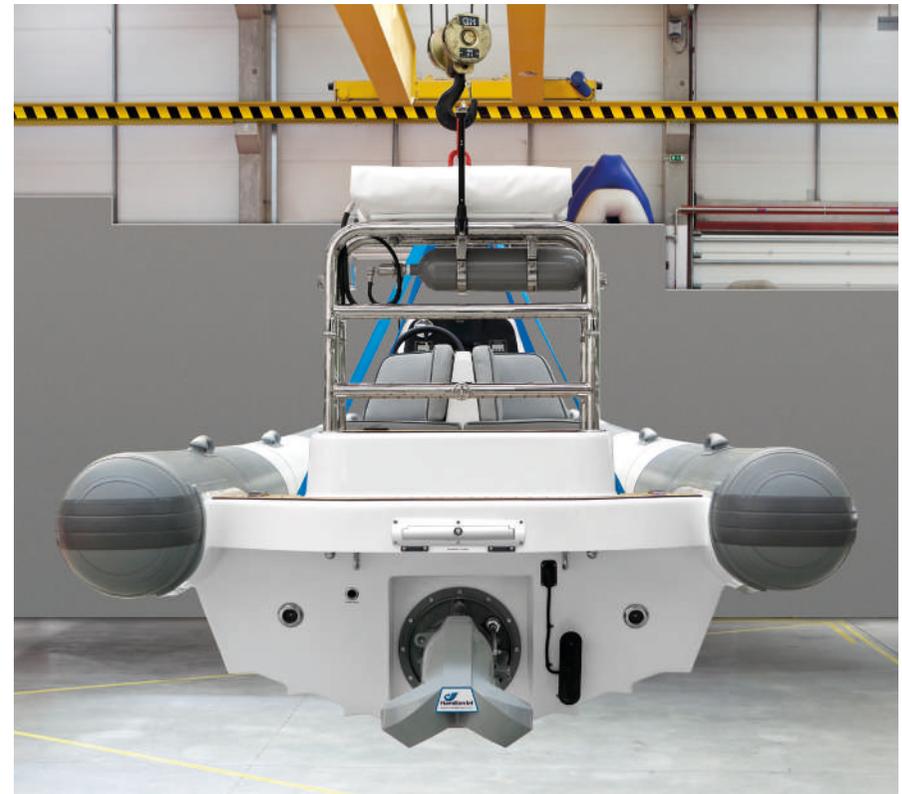

! SERVICE

Here today here tomorrow

When a private or professional customer invests in a high-value boat or fleet, it is crucial to ensure long-term durability and maximize investment value.

Vanguard Marine offers a global service policy covering everything from initial advice on boat details, configuration, and equipment to maintenance protocols.

Additionally, we have a specialized division, **Retubing®** (www.retubing-ribs.com), dedicated to maintenance, repair, and replacement of tubes on both Vanguard and multi-brand boats, ensuring compliance with the latest CE regulations on tube replacement.

QUALITY CERTIFICATIONS

Committed to Quality

- . CE Certification – Directive 2013/53/EU

I SERIE PREMIUM

Some people always travel First class

The Ultimate Bespoke Development.

This series is the result of a close collaboration between the end customer and the shipyard, where each boat is meticulously designed, detailed, and approved before construction begins.

Developed on a model-by-model basis to meet individual demands, it ranges from Luxury Chase Boats, designed to support and escort high-level regattas, to SOLAS-certified Tenderlux tenders, crafted for mega yachts over 80 meters, ensuring direct access to the stern garage.

TL-620

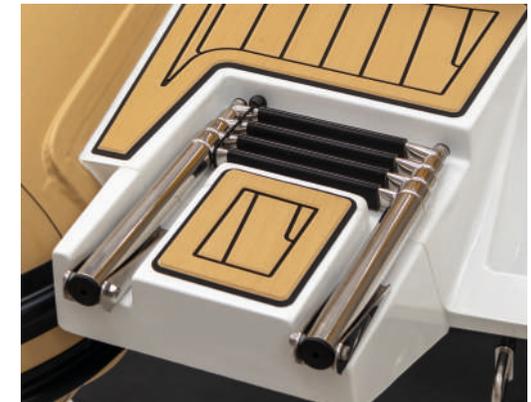

DR-600

Exclusive PREMIUM

The Premium Series stands out for its high-quality finishes, tailored to the unique needs and preferences of each customer.

With a fully customized design, each boat is unique, ensuring exclusivity, sophistication, and functionality in every detail.

| SERIE SEA ROVER

Safety . Solidity . Service

Derived from Vanguard Marine's broad experience in the professional and military sectors, these models are engineered to meet specific customer needs—whether for nautical tourism, marine observation, or wildlife monitoring. Each boat is designed with precision to guarantee performance, safety, and reliability in any scenario.

They stand out for their exceptional seafaring performance, spacious decks, and extended autonomy, as well as suspension seats and a wide range of active and passive safety elements. Propulsion systems can be outboard (OB) or inboard (IB), with stern drive or waterjet options, adapting to the desired performance, operational activities, and maintenance protocols. This flexibility maximizes boat operation, reducing downtime and additional costs.

DR-7.60 WIND-CAM - Setúbal

TX-8.60 LOBOSONDA - Madeira

I SERIE SPORT

General Purpose Boats

Recognized as the “off-road of the sea”, this series combine functionality and performance effortlessly, making it ideal for different nautical activities.

Robust, versatile, spacious, and safe, it is the essential choice for marina service fleets, federations, yacht clubs, and any operation requiring reliability in a maritime environment.

HIGHLIGHT: MR-5.95, developed to provide safety and comfort for sailing coaches and instructors, ensuring efficient support in training and competitions. With high resistance to wear and harsh environmental conditions, it significantly reduces operational and maintenance costs.

DR-4.00 Aux VAGSKAR

DR-7.60 KITESCHOOL - Alicante

DR-6.60 MRCY Baiona

Designed for Coach Boats

Engineered for safety and comfort, the MR-595 delivers excellent performance and manoeuvrability, providing essential support for training and competitions.

Built with a focus on durability, this boat uses high-quality materials resistant to wear and exposure to climatic and environmental elements, reducing long-term maintenance.

MR-595

MR-595 VALENCIA CHARTER - Valencia

| SERIE TOURING

Family & Fun

MULTIPURPOSE MODELS, perfect for enjoying time with family and friends on weekends, vacations, or coastal cruising, these boats offer a much greater passenger capacity than rigid boats of the same length.

Comfortable, stable, and fast, they allow easy planing, transport, and storage, with an extensive range of equipment and options depending on the selected model.

Highlight for the DR-600 model, compact and with great storage capacity, and for the DR-760 model, an icon of versatility, comfort, and maritime performance, offering multiple engine options – from single or twin outboard to inboard propulsion with stern drive or waterjet.

DR-450 KITESCHOOL - Alicante

DR-760 P. Mayorca

DR-760 21BOATS - P. Mallorca

DR-560 SAIL WAY - Vigo

DR-760 P. Majorca

TX-10.00 VALENCIA CHARTER - Valencia

Vanguard Marine custom-builds each boat, with a continuous commitment to product and performance improvement. This catalog serves as a general introduction, not a detailed guide to the presented models.

SAFETY FIRST

It is strongly recommended to wear life jackets and use a man-overboard safety device, in compliance with navigation regulations. Special attention should be given to young children during navigation.
